

Making clean energy accessible and usable for everyone – that’s the vision of ison. Together, we are scaling a purpose-driven business company to tackle the greatest challenge of our generation - climate change. We create and develop an innovative digital ecosystem with scalable software components that adapts the massively changing needs of customers and an energy market in disruption. We are looking for a

(Senior) Backend Developer (gn)

with experience and hands-on mentality to tackle the challenges ahead and loves the opportunity to develop things from “scratch” towards an attractive and successful customer-centered business.

You will join an early-stage startup team from pilot phase towards a well-established and clearly positioned business. With your deep technical skill in software engineering, you are playing an integral role in driving the technical solution forward.

- Together with your teammates, you will build technical solutions and create business value for connected and decarbonized energy solutions in the German market
- The core product you will be working on is the virtual power plant – focus topics are data exchange via APIs, data aggregation, forecasting, and building APIs for customer frontends
- You will have full responsibility for your solutions, including topics like DevOps and test automation
- You will support the technical team in decision making on frameworks, architecture, and operations/hosting
- You help the team grow – the role is designed to support ongoing hiring and to grow into team lead role

Your skills

- Proven track record in engineering cloud native applications
- Experience in test automation, databases, and micro services architecture
- Software engineering for backend, focus on Python and Java
- Frontend development, DevOps and cloud native skills are a plus
- 5 years+ industry experience in a comparable environment is a plus
- Ideally already experience in a scaling company with high performance teams
- Willingness to grow into project and team management area
- Team player with clear focus on your responsibilities
- Excellent problem-solving and analytical skills, and forward thinking
- Strong and positive communication skills
- Fluent English is a must – fluent German is a plus

We offer you

- Speed, agility and space to grow - personal and career-wise
- Our vision to accelerate the transition to clean energy for everyone
- The opportunity to play a key role in a lean, customer-driven business and tech development
- A hybrid work model

Do you want to join our mission and get to know the ison team? Then let's get in touch - we look forward to hearing from you!
