

Making clean energy accessible and usable for everyone – that’s the vision of ison. Together, we are scaling a purpose-driven business company to tackle the greatest challenge of our generation - climate change. We create and develop an innovative digital ecosystem with scalable software components that adapts the massively changing needs of customers and an energy market in disruption. We are looking for a

Senior Dev Ops Engineer / Architect (gn)

with experience and hands-on mentality to tackle the challenges ahead and loves the opportunity to develop things from “scratch” towards an attractive and successful customer-centered business.

You will join an early-stage startup team from pilot phase towards a well-established and clearly positioned business. With your deep technical skill in software engineering, you are playing an integral role in driving the technical solution forward.

- You are designing and delivering the Azure cloud solution which serves as foundation for connected and decarbonized energy solutions in the German market
- You are setting up the IT operations procedures to deliver state-of-the-art, high-performing solutions
- You specify and agree on technical interface definitions with our partners from the IoT and energy markets
- You will own topics from architecting your solution based on product requirements
- As part of the tech team you will also develop software yourself
- You help the team grow – the role is designed to support ongoing hiring and to grow into team lead role

Your skills

- Proven track record in operating cloud native applications with Microsoft Azure (both architecture-level and hands-on)
- DevOps and IT operations experience
- Software development skills in multiple languages, preferably Python and Java
- Experience in API specification, testing and QA
- 5 years+ industry experience in a comparable environment is a plus
- Ideally already experience in a scaling company with high performance teams
- Willingness to grow into project and team management area
- Team player with clear focus on your responsibilities
- Excellent problem-solving and analytical skills, and forward thinking
- Strong and positive communication skills
- Fluent English is a must – fluent German is a plus

We offer you

- Speed, agility, and space to grow - personal and career-wise
- Our vision to accelerate the transition to clean energy for everyone
- The opportunity to play a key role in a lean, customer-driven business and tech development
- A hybrid work model

Do you want to join our mission and get to know the ison team? Then let's get in touch - we look forward to hearing from you!
