

There will be no cleantech solution without a seamless energy market integration enabling our co2-free living – that’s the vision of ison. Together, we are scaling a purpose-driven business company to tackle the greatest challenge of our generation - climate change. We create and develop an **innovative digital ecosystem with scalable software components** that adapts the massively changing needs of customers and an energy market in disruption. We are looking for a

Product Owner (gn) – Customer Frontends & APIs

- Together with our Software Development, Product and Energy Service teams you will drive our SaaS product development and create a product experience where all services are interconnected and make a real difference from a user perspective
- You understand our customers/users and their needs for all customer frontend and API topics and support the development of our VPP (Virtual Power Plant) to bring as many assets under management as possible to ison's platform
- You observe the market and evaluate which trends are crucial for to drive the ison platform forward; your strategic impulses are reflected in future goals and product strategies
- You draw up an inspiring product vision that contributes to the ison strategy and you ensure alignment of roadmaps and that there is always clarity on what needs to happen, when and why
- You promote incremental approaches, support product discovery and delivery, and focus the teams on the essence of the product
- You participate in building an organizational structure that enables and fosters the development and growth of the ison platform

Your skills

- You are familiar with complex platform products, preferably in the field of green energy tech
- You have already gained several years of experience in digital product development – **ideally with focus on customer frontends and APIs** – and can demonstrate successes and learnings from this time
- You are proficient in using Jira and Confluence to structure user stories and backlog
- You are proactive, take responsibility for the decisions you make and go the extra mile when needed
- You have a strong interest in the utility sector or renewable energy, having professional background is a plus
- You find it easy to network within the company through your professional communication and facilitation skills and understand how to motivate teams
- You are willing to work at least 2 days a week in our office in Hamburg
- Written and spoken German and English is no problem for you

We offer you

- Speed, agility, and space to grow - personal and career-wise
- Our vision to accelerate the transition to clean energy for everyone
- The opportunity to play a key role in a lean, customer-driven business and tech development
- A hybrid work model, combined with the benefits of an office in central Hamburg

Do you want to join our mission and get to know the ison team? Then let's get in touch - we look forward to hearing from you!
